

## AXIS VENTURES WAREHOUSE – GHANA

In 2010, the steel structures in the newly built warehouse from 'Axis Ventures' were protected with 2 layers of **ZINGA** by **WITSON** Company in order to give them the maximum protection against corrosion.

The building is now in use by 'Expro Gulf Ghana Base Facility Service Centre – Takoradi' that is mainly active in the oil and gas industry.

In total 3.500Kg of **ZINGA** were used on this construction.

### System:

HP cleaning and blasting to SA 2,5  
and Rz 50-70µm

ZINGA

2 x 60 µm DFT
