## MUMBAI DOMESTIC AIRPORT - INDIA

The domestic terminals in Mumbai with the same name as its international wing are in Santa Cruz, East of Mumbai. There are two domestic terminals - Terminal 1A (with an area of 28960 sqm), and Terminal 1B (with an area of 45000 sqm).

Terminal 1B was constructed by **Unity Infrastructures** while the Structural Consultants were **M/S Mahimtura & Co.** 

In 2006 all steel structures including the huge curbed spans of the new airport of Mumbai Domestic Airport are coated with **ZINGA** and finished with a white PU.

5 years after application the structures still look as if they were treated yesterday.

System: ZINGA 1 x 60 µm DFT Topcoat PU White

#### TO WHOM-SO-EVER IT MAY CONCERN

This is to confirm that all Steel Structures fabricated by us for M/S UNITY INFRAPROJECTS LIMITED which have been used for modernization of Terminal 18 of Mumbai Airport have been coated with ZINGA as primer for corrosion protection.

The results of this coating application have been found satisfactory.

For Pratibha Pipes & Structural Pvt Ltd

Authorized Signatory.

This testimonial was written by the responsable of **Pratibha Pipes & Structural Pvt. Ltd.**, the steel constructor and coatings applicator, after application.

Factory : Plot No. 424, Village Kondla, Taluka Wada, Dist. Thane
