

## PLN HIGH TENSION PYLONS - INDONESIA

**PLN (Perusahaan Listrik Negara)** is a state owned electricity company in Indonesia which controls the main part of the electricity supply in Indonesia.

After thorough investigation and test applications, PLN has made the step towards protecting complete high tension pylons using **ZINGA**.

In May 2011 a first high tension pylon (150kV) was protected with **ZINGA** because textile industries had severely attacked the old hot-dip.
