

REBARS – NATIONAL IRANIAN GAS COMPANY – IRAN

In December 2001 the **NATIONAL IRANIAN GAS COMPANY** has used **ZINGA** for the protection on rebars to reinforce the concrete walls of large containers, during the construction of a sulphur Jetty project constructed by **PERLITE** company, in the special industry zone in Assaluyeh. It was a very large project and it did take about 5 years to complete.

For the application of **ZINGA** they used a specially designed spraying machine for rebars.

System:
ZINGA 1 x 40 µm DFT
