

Rebar repairs Kudat Port Jetty – SABAH PORTS – MALAYSIA

In January 2021 the Team of **ZINGA Sabah** (East Malaysia) started to repair and replace corroded rebars which were spalling the concrete of the **Kudat Port Jetty** belonging to **SABAH PORTS (SPSB)**, a wholly-owned subsidiary of **Suria Capital Holdings Berhad**.

SABAH PORTS specified **ZINGA** for the repairs and the Contractor **3R Systems** (Petaling Jaya, Kuala Lumpur) won the tender.

Where necessary the contractor added new pre-Zingitized rebars.
