

## SOLAR PARK STRUCTURES – TILSECO – MEXICO

**TILSECO** is a young and innovative Spanish company specializing in electrical installations, airport maintenance and the execution of photovoltaic projects since 2006.

**TILSECO** has branches in various countries such as Mexico, Chile, Ecuador, Honduras, USA and Kenya.

The solar park “Las Lomas de Ocampo” was completed in 2018.

**ZINGA** was used to repair the hot dip galvanized supporting structures where needed on cutted, welded and bolted profiles.

6 tons of **ZINGA** were consumed for the entire project.

System:  
Manual surface preparation  
ZINGA by brush: 60-80 µm DFT
